

CAPSULVISC®

3.0% Sodium Hyaluronate

SPECIFICATIONS

Reference	CAPSULVISC 3% (single unit)
Composition	Bio-fermented Sodium Hyaluronate 3%
Description	CAPSULVISC 3% has been formulated to provide an OVD with outstanding optical clarity. CAPSULVISC 3% is the ideal partner for the CAPSULaser system in that it optimises the optical path in the anterior chamber during selective laser capsulotomy.
Concentration	Sodium Hyaluronate 30mg/ml
Molecular Weight	Approximately 750,000 Da
Zero Shear Viscosity	30,000 mPas
Osmolality	300 - 350 mOsm/kg
Storage Conditions	2 - 25°C (non-refrigerated)
Shelf-life	3 years
pH Value	6.8 - 7.6
Characteristic	Dispersive
Optical Performance	Optical grade, high transmission
Volume	1.1ml
Origin	Bio-fermented
Cannula	25g
Sterilization method	Double sterilized - Steam and ETO
Latex Free	Yes

CE 1984
